Chrome furniture

The **Ultimate**Rose

The Ultimate Rose is the epitome of the Rose Collection design philosophy – an outstandingly authentic, exceptionally-performing and work of art.

The Ultimate Rose was one of the very first uPVC sash windows to be cleared for use in conservation areas – and it's still the best. With slim timber-like profiles and a 35mm meeting rail, no other sash window looks as authentic. And with period features as painstakingly detailed as full mechanical joints, deep bottom rail and external putty lines, it would take an expert to tell it apart from a genuine timber sash.

What's more, you get all that careful craftsmanship, historic detailing and vintage appeal with the all-round exceptional performance of twenty-first century uPVC. It's why we call it the Ultimate Rose.

Ultimate Rose Period Features

It's the little things that make the Ultimate Rose special – the tiny details that make it virtually indistinguishable from a classic timber sash.

Huge effort over decades has gone into making the Ultimate Rose as authentic as it can possibly be – culminating in a much-coveted G Award in 2013.

Here's what makes it so spectacular:

The Outside

- Full mechanical joints
- Putty lines on outside
- Woodgrain finish
- Authentic astragal bars
- 35mm meeting rail
- Run-through sash horn
- Deep bottom rail

Traditional globe claw furniture

Woodgrain finish

Meeting rail with RTH

Full mechanical joints

ENFIELD WINDOWS

Ultimate Rose

Sash windows are quintessentially British; they've been an important part of our architectural heritage since the 17th century. Unfortunately, many original sash windows have already been lost; replaced with inappropriate low-cost casements that aren't sensitive to their surroundings. In response, more and more parts of the UK are being designated as conservation areas, sometimes with the extra protection of an Article 4 Directive. This helps to preserve the character and appearance of an area, and in doing so protect our architectural heritage.

Rose Collection sash windows have heritage and conservation at the heart of their design. In an area where sash windows are common, the Rose Collection blends in perfectly—a far superior option than the “mock sash” casement windows used so often in the past.

As you move up the model range, so you move up in terms of authenticity. At the top you have Ultimate Rose—a window that looks and feels exactly like an original timber sash window, even from close up. In fact they're so authentic, we often receive comments from customers who say that people don't know they've replaced their windows with Rose Collection timber-alternatives. That's why Rose Collection sash windows have been approved for use on projects in conservation areas across the UK.

Technical Details

ENFIELD WINDOWS

Frame No: 1

Overall size: 1050mm x 1500mm

Split from Top: 750mm

Qty: 1

Rear Kitchen window

System

Ultimate Rose Mk3 VS

Run-Through Sash Horn
