[REDACTED]

We live next door to this property which has recently undergone a significant amount of refurbishment. The proposed new side window is considerably larger than the one currently in the side wall and we feel will enable direct overlooking through a long standing window in our side wall , thus potentially leading to loss of privacy . Enlargement of the back window will make it easy to get out onto the new flat roof , as can be easily seen in Fig 11 pg 5 of the submission. This will cause overlooking of our property and the potential use of the small flat roof area as an external balcony , as well as direct view into our glass roofed conservatory , which will cause us [REDACTED] as well as potential noise pollution.

Please can you will consider these comments when making your decision.
