Rear garden

1/ Tree of heaven: tree growing in the rear of the garden against a boundary/retaining wall which has now collapsed, the garden is raised in relation to the properties to the rear, and is in need of replacement. The tree has extensive scarring to the base, there is consent to reduce the tree but due to its position in relation to the boundary walls and its relatively poor condition we would now like to apply to fell the tree and replace with another tree further into the garden, the reduction has not been carried out.

Yours sincerely

C. HOWARD
