

Transport infrastructure

- 10.22 Projects to provide new and improved transport infrastructure will play a central role in supporting growth and promoting sustainable transport within the borough. As major development will largely be concentrated in locations that are, or will be, subject to significant transport improvements, land and facilities will therefore need to be safeguarded in order to ensure delivery of these projects.

Policy T3 Transport infrastructure

The Council will seek improvements to transport infrastructure in the borough.

We will:

- a. not grant planning permission for proposals which are contrary to the safeguarding of strategic infrastructure improvement projects; and
- b. protect existing and proposed transport infrastructure, particularly routes and facilities for walking, cycling and public transport, from removal or severance;

- 10.23 Camden's Infrastructure Table (Appendix 1) contains details of the key infrastructure improvements due to take place. The schedule includes 32 transport projects such as:
- High Speed 2: new north-south railway linking London to Birmingham including potential redevelopment of Euston Station.
 - Crossrail 1: new east-west railway through London from Reading/Heathrow to Abbey Wood and Shenfield.
 - Crossrail 2: new north-south railway running from Surrey to Hertfordshire through London.
 - West End Project: introduction of two-way traffic at Tottenham Court Road and Gower Street and public realm improvements, including at Euston Circus, St Giles Circus and Princes Circus.
 - Camden Town and Holborn Station capacity improvements.
 - North-South Cycle Superhighway: segregated cycle corridor between King's Cross and Elephant and Castle.
- 10.24 Given the constraints on transport capacity in a densely developed borough like Camden, almost every part of existing transport infrastructure is a valuable asset. The Council will therefore seek to protect all existing and proposed transport facilities and links and safeguard the potential for improvements to the transport network.
