2022/5470/P	Emma Chapman	01/02/2023 21:44:15	SUPPRT	I strongly support this application. I have also applied for permission to undertake similar work. The design in this application is similar to the existing roof extensions at No's 24-32 Elliott Square and those recently approved for No's 10-15 Elliott Square. Having a consistent design approach ensures that architectural quality is maintained across the estate. I would also note that the proposed design and construction to current standards will improve the energy efficiency of the existing property and reduce its carbon emissions.
