Subject: Application ref 2023/0344/T

I refer to notification I received 2nd February 2023. This notification is identical to one I received in 2022. The property 1 Steeles Road has been under extensive unsupervised dangerous work for 11 months . As neighbours we have had an appalling time and suffered great damage. I think the tree you mention has already been removed but there are a line of other trees along Fellows Road side of 1 Steeles Road . These trees were never appropriate for the site . Given that in the last year we have suffered from continual abuse coercive intimidation regarding the vanity project which 1 Steeles Road has become we would appreciate knowing if this like so much else is confused messages. The appalling history of this project needs close examination on every level. Meanwhile we continue to suffer. Christine Brody
