And/or: Are there trees or hedges on land adjacent to the proposed development site that could influence the development or might be important as part of the local landscape character? Yes No

If Yes to either or both of the above, you may need to provide a full tree survey, at the discretion of the local planning authority. If a tree survey is required, this and the accompanying plan should be submitted alongside the application. The local planning authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to design, demolition and construction - Recommendations'. Assessment of Flood Risk Is the site within an area at risk of flooding? (Check the location on the Government's Flood map for planning. You should also refer to national standing advice and your local planning authority requirements for information as necessary.) Yes **⊘** No Will the proposal increase the flood risk elsewhere? ○ Yes **⊘** No How will surface water be disposed of? ☐ Sustainable drainage system Existing water course ✓ Soakaway Main sewer □ Pond/lake **Biodiversity and Geological Conservation** Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site? To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals. a) Protected and priority species O Yes, on the development site Yes, on land adjacent to or near the proposed development b) Designated sites, important habitats or other biodiversity features Yes, on the development site Yes, on land adjacent to or near the proposed development ✓ No c) Features of geological conservation importance O Yes, on the development site O Yes, on land adjacent to or near the proposed development **⊘** No

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.
Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.
Your local planning authority will be able to advise on the content of any assessments that may be required.

The proposed width and height of the extension are considered to be acceptable. The loss of the historic bay window at the lower-ground floor level is accepted given its non-prominent position.
The Council would encourage the use of materials and finishes that are sympathetic to and/or match the host property. The proposed modern glazing on the rear extension would be acceptable in this non-prominent location on the building and is thus considered acceptable.
A sedum roof is proposed for the rear extension. Biodiverse green roofs with a minimum substrate of 100mm are preferred over sedum roofs, as they provide a greater biodiversity value. Details including a maintenance plan should be provided with any application.
Although the principle of a basement is acceptable in this instance as it meets many of the criteria within Policy A5, criterion (h) requires that the basement not exceed 50% of each garden within the property. According to the submitted drawings, the proposed basement would encompass more than 50% of the rear garden, which is contrary to policy and would not be supported. CPG Basements advises that basement development that extends below garden space can also reduce the ability of that garden to support trees and other vegetation leading to poorer quality gardens, a loss in amenity and the character of the area, and potentially a reduction in biodiversity. Options should be explored to reduce the size of the basement to a maximum of 50% of the rear garden area. Additionally, the number of skylights should be reduced to help limit the amount of illumination and light spill into the rear garden.
The proposed rear extension would be located along the shared boundary with no.3 Adamson Road. It is unlikely to result in any additional negative impact to the neighbouring amenity as the height of the extension would not extend past the existing 3.5 metre tall, shared boundary wall. The rear extension is therefore in compliance with Policy A1. Given the distances between the proposed rear extension and other
