Tree work at 19 Arkwright Road, NW3 6AA

T1 Ash tree located at the rear of the property to be crown reduced by 2m and to remove deadwood. This tree when in leaf blocks a lot of light to the rooms especially the ground floor level. A reduction will help maintain healthy size and shape for the tree.

Photo to the left is T1 taken from the second floor level.

T2 Holly tree to be felled to ground level. This tree is right on the boundary line and has now out grown its space. The removal of this tree will let more light in to the garden as its always in shade.

Photo to the right is T2 taken from the second floor level

T3 - Cherry tree located in the front garden to be crown reduced by up to 1.5m. This will help maintain the shape and size of the tree and help slow the growth of the roots down.
