

## Wildflower species – 2022

A mix of sedum for base cover of the M-Tray® modules with a variety of low-growing, perennial wildflower species. These plants are tolerant to dry conditions and suitable for substrate a depth of 100mm.

The wildflower plants will produce flowers up to a height of approx. 50cm and attract bees and butterflies. As it is made up of a wide range of native (& wild origin) flowering species and grasses to maximum diversity and reduce the amount of dead vegetation at the end of the summer.

Wildflowers often take 2-3 years to fully germinate and flower, and some species are viable only as annual and biennial flowers, so new seeds should be broadcast regularly.

### **Anythyllis Vulneraia/ Kidney Vetch**

Flowering Period: June to September

Approx. height: 30cm

### **Armeria Maritama/ Thrift**

Flowering Period: May to September

Approx. height: 25cm

### **Bellis Perennis/ Common Daisy**

Flowering Period: May to July

Approx height: 25cms

### **Lotus Corniculatus/ Birdsfoot Trefoil**

Flowering Period: May to September

Approx. height: 10cms

**Oreganum Vulgare/ Wild Marjoram**

Flowering Period: Spring/Summer

Approx. height: 10cm

**Silene Uniflora/ Sea Campion**

Flowering Period: June to August

Approx. height: 10mm

**Thymus Polytrichus/ Thyme**

Flowering Period: May to September 2022

Approx. height: 15mm

**Viola Tricolor/ Wild Pansy**

Flowering Period: May to October

Approx. height: 20cm

**Chamaemelum Nobile/ Roman Chamomile**

Flowering Period: June to July

Approx. height: 10-20cm

**Myosotis alpestris/ Alpine Forget Me Knot**

Flowering Period: Spring to early Summer

Approx. height: 15-20cm

**Erigeron Speciosus/ Fleabane**

Flowering Period: July to October

Approx. height: 100cm
