2022/5249/P	D leader	21/02/2023 16:12:46	COMMNT	We are concerned about the acoustic impact of the proposed equipment to be installed externally. The previous occupants of this site installed noisy fans and vents without planing permission, which created considerable disturbance to the area. We would hope that the new proposals are carefully examined re acoustic levels and the agreement of the immediate residents is obtained. Extensive development of external fans and vents risks creating substantial noise impact, and if work is to take place here the proper hoods and sound limiting structures must be installed.
