2023/0665/P	Jonathan Byatt	22/02/2023 03:03:43	OBJ	Objection: the proposed development with radically alter the character of of this street in a conservation area. The streets and the surrounding area have a distinct character with a similar and continuous frontage which helps sect the character of the area. This proposal breaks with that tradition and creates the first of many such future proposals which will ultimately remove the unique character of the row and the streets(area) itself. The many ways to protect the frontage and and consistent height of of the room without this lazy approach to demolition and and build new.
