We object to the very large skylight proposed for the ground floor extension, especially whe there are already large floor to ceiling windows facing both back towards the house and out to the garden (almost full width). The additional light pollution that will be caused by this rooflight is not acceptable and there is no need for extra daylight within the room. The Committee also considers the substantial basement dig out into the garden to be unsympathetic to the typology of these listed houses and their historic fabric. Do you want to attach any files?
