2023/0634/T	Oliver Brettle	06/03/2023 12:47:24	OBJ	<p>I wish to object to the scale and extent of this application. When the original planning permission was granted for this site the application was highly contentious. Included in making the application contentious were (a) the presence of the underground parking in contravention of the council's own guidance to prioritise public transport and the consequent damage to the environment caused by extensive earthworks required for the underground parking (b) the sensitive nature of the site from a wildlife perspective and (c) the need to create much-needed public access and public green space. In particular the action set out for T3, T5, T10, T20 are wholly disproportionate. It seems highly unfair that the wildlife suffers simply for the convenience of the development. I would urge the Council's tree officers to work with the owners of the development to come up with a proportionate plan of action and reduce only where truly necessary.</p>
