**Proposed Works**

1. Removal of the existing non-original door to the storage cupboard to allow air flow and restrict risk of further mould growth.
2. Removal of 6no. existing wired glass panes from Mezzanine Room side. Stop beads to be carefully dismantled for reinstatement. All other timber frame elements to be retained in situ
3. 6no. new patinated decorative brass grilles to be fitted in place of glass to ventilate room. Existing stop beads to be reinstated from Mezzanine Room side. The geometric pattern references existing decorative timber panels to the Camden Centre and decorative ventilation grilles to the Council Chamber which have been replicated in patinated brass elsewhere in the building at first floor as ventilation grilles.
4. New fire-rated partition to be installed to provide fire compartmentation to the protected staircase. Opening formed in new partition to create airflow path from the new brass grilles into the room. The opening is to be located below sill level so as not to be visible through the decorative grilles. The cavity facing side of the new partition is to be painted black to limit visibility through the decorative grilles.
5. New fire-rated motorised smoke and fire damper to be installed in new partition to complete fire compartmentation line on detection of a fire.
