Subject: Planning application 2023/0750/T

Dear Sir/Madam

Proposed removal of lime tree

We received notification for an application by our neighbours in flat 2, 113 Canfield Gardens NW6 3DY. to fell the lime tree in their rear garden. We strongly support the application as the tree roots are causing damage to the boundary brick wall between our gardens which is in imminent danger of collapse. Rebuilding the wall is going to be a very costly exercise. Replacing the wall around the tree will also encroach on our garden. Any replacement wall without removal of the tree and roots will be subject to further damage and likely collapse.

Our gardener, Ravi Malhotra of Indian Summer Gardens, has long advised removal of the lime tree and grounding out the roots which have pushed the foundation of the existing wall to the point where it will collapse. He also advised the lime tree could be replaced by a small to medium sized tree so there would be no overall tree loss.

We would like Camden to approve the application so the tree can be removed as soon as possible before the wall collapses completely.

Yours sincerely
Bev and Roger Murray
Flat 7 115 Canfield Gardens
NW6 3DY
